

DUST TREATMENT AND PREVENTION THAT STUDENTS CAN TAKE

Dust prevention in unsri can not be done with large car restrictions as they are driven by road traffic, So the solution might be to keep the roads dry and reduce the quantity of dust around unsri

Can also by using an effective nozel spray to remove dust particles, so that dust does not kick in and spread in the air and improve the quality of the environment

RECOMMENDATION

Proper precautionary measure:

Using a dust mask

To Police

Minimizing dust exposure in work or in the day

Reducing dust shells

CO₂
